

java.antlet

by Antlet Documentation

Description: The core antlet for a Java project. It features all the basic targets that are needed to compile and package the code, as well as targets that create information about the antlets and descriptors of a project.

1. Main Targets

compile-src
<i>Description:</i> Compiles the core source code
<i>Comment:</i> =
compile
<i>Description:</i> Compiles all the sources
<i>Comment:</i>
package-src
<i>Description:</i> Generates the core jar packages
<i>Comment:</i> =
package
<i>Description:</i> Generates the jar packages
<i>Comment:</i>
clean
<i>Description:</i> Cleans the build directories
<i>Comment:</i> =

dist-src
<i>Description:</i> Prepares the source distribution
<i>Comment:</i> =
dist-src-zip
<i>Description:</i> Generates the source distribution as a .zip file
<i>Comment:</i> =
dist-src-tgz
<i>Description:</i> Generates the source distribution as a .tar.gz file
<i>Comment:</i> =
dist-bin
<i>Description:</i> Prepares the binary distribution
<i>Comment:</i> =
dist-bin-zip
<i>Description:</i> Generates the binary distribution as a .zip file
<i>Comment:</i> =
dist-bin-tgz
<i>Description:</i> Generates the binary distribution as a .tar.gz file
<i>Comment:</i> =
dist-jar
<i>Description:</i> Generate a jar distribution
<i>Comment:</i> =
distclean
<i>Description:</i> Cleans the distribution dir
<i>Comment:</i> =

java.antlet

dist
<i>Description:</i> Generates all distributions (source/binary)
<i>Comment:</i> =
javadocs
<i>Description:</i> Generates the API documentation in javadoc format
<i>Comment:</i> =
splash
<i>Description:</i> AntWorks GUI Splash Screen
<i>Comment:</i> =
descriptor-docs
<i>Description:</i> Transforms document and antlet descriptors' info in documents
<i>Comment:</i>

2. Helper Targets

pre-dist
<i>Description:</i>
<i>Comment:</i> =
dist-info
<i>Description:</i>
<i>Comment:</i> =
java-javadocs-check
<i>Description:</i>
<i>Comment:</i> =

3. Internal Targets

-java.init
<i>Description:</i>
<i>Comment:</i>

-check-code-presence
<i>Description:</i>
<i>Comment:</i>

-check-classes-presence
<i>Description:</i>
<i>Comment:</i>

-fixsrcif
<i>Description:</i> Fix If in src directory (internal use only!)
<i>Comment:</i> =

4. Internal Properties

project.package
<i>Description:</i> *
<i>Comment:</i> TODO Packagelist for javadoc should be obtained from module.xml with jxpath

java.antlet:javadocs.dir
<i>Description:</i> \${project.build.dir}/docs/javadocs
<i>Comment:</i>

java.antlet:work.dir
<i>Description:</i> \${project.build.dir}/work
<i>Comment:</i>

java.antlet:dist.source.dir

java.antlet

<i>Description:</i> \${java.antlet:work.dir}/dist-src
<i>Comment:</i>

java.antlet:dist.bin.dir
<i>Description:</i> \${java.antlet:work.dir}/dist-bin
<i>Comment:</i>

java.antlet:dist.bin.legal.dir
<i>Description:</i> \${java.antlet:dist.bin.dir}/legal
<i>Comment:</i>

java.antlet:dist.bin.documentation.dir
<i>Description:</i> \${java.antlet:dist.bin.dir}/docs
<i>Comment:</i>

project.name-version
<i>Description:</i> \${project.name}-\${project.version}
<i>Comment:</i>

java.antlet:javadocs.group
<i>Description:</i>
<i>Comment:</i>

java.antlet:javadoc.overview
<i>Description:</i> \${java.antlet:work.dir}/javadocs/overview.html
<i>Comment:</i>

java.antlet:antletdocs.work.dir
<i>Description:</i> \${java.antlet:work.dir}/contents/xdocs/centipede
<i>Comment:</i>

java.antlet:xdocs.dir
<i>Description:</i> \${forrest.antlet.generated.xdocs.dir}/centipede
<i>Comment:</i>
